

7.2 Best Practices

7.2.1 State at least two institutional best practices

Details of two best practices followed by the institution:

(a) To impart moral education among the girls of the College.

Moral education is very essential in today's society. So, taking its importance into account, the girls of our College are given regular instructions about the utility of such education in their life. Girls are given lessons about use of Facebook & WhatsApp in mobile phones and how it affects adversely if not properly used. So, they are taught to control themselves and always tread over the right path which will lead them to peace & happiness and make a good citizen of our society. Many people of this town are living in slums and the children are either not admitted in the School or they are leaving the School halfway through. They are deprived a lot in the society. The students of our College are educated through NSS & Red Cross to teach these illiterate and drop out students of our area and bring them to the main stream of life. It becomes very successful.

(b) To make the girls aware about road traffic to prevent accident.

Since the College is situated in the heart of the town, the students have to come to the College through busy main roads and streets. Very often, they face minor accidents due to traffic jam. They are taught about road safety and how to ride vehicles and they are educated how to tackle such problems and avoid accidents.
